## **Raybestos Remains Committed to Offering Full Line of Brake Shoes**

**MCHENRY, III., Jan. 11, 2016** – Raybestos® will continue to provide a full line of quality brake shoes at a time when many brake suppliers are exiting the category, according to Bruce Tartaglione, senior vice president of global sales and marketing for Brake Parts Inc.

“The Raybestos brand is widely recognized as the best in brakes, not only in quality and service, but in comprehensive coverage of brake system components, including brake shoes,” said Tartaglione. “We want to assure our customers that as a dedicated brake supplier, we offer more than just pads and rotors. Shoes are critical to brake system repairs and so we remain committed to providing a full line program, at the right price, that our customers can rely on.”

Engineered for proper fit, form and function to match original equipment design, Raybestos brake shoes are specially formulated to provide quiet operation, reliable performance and increased service life. They are copper-free and include attached levers and pins for an easy and complete installation.

For more information about the complete line of quality Raybestos brake products, including disc pads and shoes, rotors and drums, master cylinders, wheel cylinders, calipers, hoses, cables and hardware, visit [www.RelyOnRaybestos.com](http://www.RelyOnRaybestos.com).

### **About Raybestos Brakes**

Raybestos® has been known as the best in brakes for over 100 years. With a demonstrated commitment to research, development and testing, Raybestos is widely recognized for quality brake components, including friction, rotors, drums, calipers and hydraulic products. The company was the first to introduce Enhanced Hybrid Technology (EHT™) with its Element3™ brake pads, delivering the best attributes of ceramic and semi-metallic for optimal performance, improved pad wear and durability, and increased stopping power during aggressive braking.
