Raybestos Adds More Caliper Line Coverage

Includes New Part Numbers for Opti-Cal, RPT Rust Prevention Technology

MCHENRY, Ill., Sept. 17, 2018 – Raybestos® has expanded its comprehensive caliper line with the addition of more new part numbers for its Opti-Cal™ premium new brake calipers and RPT Rust Prevention Technology™ plated brake calipers.

“We have made significant investments in research, development, testing and inventory levels to ensure timely shipments of top quality calipers that provide all-weather protection and durability, while inhibiting rust and extending product life,” said Kristin Grons, marketing manager, Brake Parts Inc. “By adding more caliper coverage of popular domestic and import nameplate applications, we continue to meet the needs of our valued customers.”

With 100 percent new components, no core return and lower warranty rates, Opti-Cal calipers provide hassle-free installation and optimal performance. Designed and manufactured to strict Raybestos engineering specifications, these award-winning premium calipers offer original equipment precision at a fraction of the cost of OE.

RPT Rust Prevention Technology plated brake calipers are premium quality, remanufactured calipers that function and fit like OE. RPT calipers are friction ready and engineered for safe, leak-free operation. The plated brake calipers maintain their high-quality appearance and deliver continued functionality throughout their extended service life.

For more information about Raybestos Opti-Cal new brake calipers or RPT Rust Prevention Technology plated brake calipers, contact your Raybestos representative or visit www.raybestos.com.

About Raybestos Brakes

Raybestos® has been known as the best in brakes for over 100 years. With a demonstrated commitment to research, development and testing, Raybestos is widely recognized for quality brake components, including friction, rotors, drums, calipers and hydraulic products. The brand was the first to introduce Enhanced Hybrid Technology (EHT®) with its Element3® brake pads, delivering the best attributes of ceramic and semi-metallic for optimal performance, improved pad wear and durability, and increased stopping power during aggressive braking. Raybestos is the flagship brand of Brake Parts Inc, a global supplier to major auto parts organizations. To learn more, visit www.raybestos.com.
