Brake Parts Inc Promotes Rick Woodside to General Manager, Hydraulics, Drums and Rotors

MCHEMRY, III. – Nov. 14, 2016 – Brake Parts Inc (BPI) has promoted Rick Woodside to the position of general manager, hydraulics, drums and rotors, it was announced today by David Overbeeke, president and CEO of Brake Parts Inc.

“We congratulate Rick on this well-deserved promotion. His new position and additional responsibilities are the result of the contributions that he has made to BPI and the Raybestos brand over the past 20 years,” said Overbeeke. “Rick’s extensive knowledge of the product category as well as his experience serving the industry will be most beneficial as we continue to grow our hydraulic, drum and rotor lines, both in the United States and abroad.”

In his new role, Woodside will manage the product life cycle for BPI hydraulics, drums and rotors and has responsibility for the operation of the Haimeng rotor plant in Shandong, China.

Woodside began his career with BPI more than two decades ago at the company’s McHenry, Illinois plant. He went on to become part of the NAPA Brakes sales team as a district sales manager before joining the product development group as a hydraulics product manager. Over the past six years, Woodside’s primary focus has been BPI’s largest product category (drums, rotors and hydraulics), launching BPI product programs for customers in Europe and North America.

About Brake Parts Inc

Brake Parts Inc (BPI) is committed to leading the global automotive aftermarket as the premier manufacturer and supplier of brake system components. The company’s primary focus is the growth and profitability of its customers through a collaborative platform of quality, innovation, dedication and integrity. BPI has a demonstrated commitment to research, development and testing of its entire product offering, including friction, rotors, drums, calipers and hydraulic products, ensuring that they meet or exceed original equipment fit, form and function requirements.
