## Raybestos Increases Coverage of RPT Rust Prevention Technology Rotor, Caliper Lines

**MCHENRY, Ill., Jan. 29, 2018** – Raybestos® has increased coverage of its premium quality RPT Rust Prevention Technology™ rotor and caliper product lines with the recent addition of 67 rotor part numbers and 72 caliper part numbers.

“The timing of new RPT Rust Prevention Technology rotor and caliper part number introductions couldn’t be better as large parts of the country are currently dealing with harsh winter weather conditions and corrosive road treatments,” said Kristin Grons, marketing manager, Brake Parts Inc. “Raybestos RPT coated rotors and plated calipers provide all-weather protection against the elements, including snow, salt and rain, inhibiting corrosion and rust.”

[RPT Rust Prevention Technology coated rotors](#) use a propriety finishing technology to evenly coat each rotor’s entire surface, including the cooling vanes. The full Grey Fusion 4.0™ coating helps resist corrosion and significantly delays rust-induced performance issues. Open-wheel designs on modern vehicles leave brake parts, particularly rotors, more exposed to the elements. If a rotor is uncoated, corrosion and red rust begin to form immediately.

[RPT Rust Prevention Technology plated brake calipers](#) are engineered to face the toughest weather conditions. A proprietary zinc electroplating process helps prevent rust and provides protection for all kinds of weather. The plated brake calipers maintain their high-quality appearance throughout their service life, delivering continued functionality and an extended service life.

In total, Raybestos added 372 part numbers during the fourth quarter of 2017, including 151 brake rotors, 41 brake pad sets, 98 brake caliper and brackets, 10 brake calipers, 16 master cylinders, 13 brake hoses, two wheel cylinders, 33 hardware numbers and eight wheel hub assemblies.

For more information on the complete family of Raybestos brake products, including disc pads and shoes, drums and rotors, wheel cylinders, calipers, hoses and hardware, visit the website at [www.raybestos.com](http://www.raybestos.com).

### About Raybestos

Raybestos® has been known as the best in brakes for over 100 years. With a demonstrated commitment to research, development and testing, Raybestos is widely recognized for quality brake components, including friction, rotors, drums, calipers and hydraulic products. The brand was the first to introduce Enhanced Hybrid Technology (EHT®) with its Element3® brake pads, delivering the best attributes of ceramic and semi-metallic for optimal performance, improved pad wear and durability, and increased stopping power during aggressive braking. Raybestos is the flagship brand of Brake Parts Inc, a global supplier to major auto parts organizations. To learn more, visit [www.raybestos.com](http://www.raybestos.com).
