

Raybestos Brand Brakes Adds 500 New Part Numbers to its Line of Premium Quality Brake Products

MCHENRY, Ill., Dec. 9, 2014 – Raybestos® brand brakes has added more than 500 new part numbers to its line of premium quality brake products within the following categories: brake hoses, brake cables, hardware, hydraulics, friction and calipers.

In addition, the company recently announced the addition of 100 new part numbers to its Element3™ friction line. Element3 with Enhanced Hybrid Technology (EHT™) combines the best attributes of ceramic and semi-metallic all in one pad. This innovative engineering breakthrough ensures optimal performance, improves pad wear and durability, and delivers unsurpassed stopping power and vehicle control, even under the most aggressive braking conditions.

“Our profound commitment to research and development allows us to continuously expand our product offering with innovative, premium quality brake parts that today’s professional technicians require to get the job done right the first time,” said Terry Heffelfinger, vice president of product development R&D/quality, Brake Parts Inc.

The complete family of Raybestos brand brake products include disc pads and shoes, drums and rotors, master cylinders, wheel cylinders, calipers, hubs, hoses and hardware. New part numbers and their applications can be downloaded in a PDF format by visiting the new number announcements section of the Raybestos brand website at www.RaybestosBrakes.com.
